

ANIL MAKHIJA

Senior iOS Engineer | Swift, SwiftUI & React Native | Mobile Architecture & Leadership | BLE & IoT

Bengaluru, India | +91-9510473437 | makhija61@gmail.com | [LinkedIn](#) | [GitHub \(Engineering Portfolio\)](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior iOS Engineer with 11+ years of experience designing, building, and leading native iOS (**Swift, SwiftUI, UIKit**) and cross-platform **React Native (TypeScript, 5+ years)** applications for consumer and enterprise products. Architects scalable, testable systems using **MVVM, VIPER, Clean Architecture**, and **SPM** modularisation, with hands-on **Swift Concurrency** (async/await, **Actors**), **Combine**, and **GCD** expertise. Designs adaptive, responsive layouts across iPhone and iPad using Auto Layout, size classes, and **SwiftUI** adaptive containers. Deep specialization in **BLE (CoreBluetooth)** and IoT connected-device platforms — shipped multi-device discovery, real-time telemetry, and OTA firmware experiences for 50,000+ users. Strong foundation in REST/**GraphQL** APIs, mobile security, and **CI/CD** automation (**Fastlane, GitHub Actions, Jenkins**). Technical leader who has led teams of up to 6 engineers, mentored engineers, and partnered cross-functionally with Product, Design, Backend, and QA across distributed Agile teams. Leverages AI-assisted development tools (**GitHub Copilot**, Claude, Cursor) for refactoring, test generation, and documentation.

CORE HIGHLIGHTS

- 11+ years building and leading native iOS & cross-platform mobile applications
- Designed adaptive, responsive layouts across iPhone & iPad on most shipped apps, including both SMA apps
- Led engineering teams of up to 6; mentored engineers on architecture and code quality
- 25+ production mobile apps shipped across IoT, Energy, Healthcare, Travel, and Consumer domains
- Delivered connected-device platforms supporting 50,000+ active users
- Strong track record in architecture, performance optimization, security, and **CI/CD** automation
- Domains: IoT & Smart Energy, Healthcare & Insurance Benefits, Travel & Government Services, Consumer Mobile Applications

CORE TECHNICAL SKILLS

Languages: Swift (expert), Objective-C, **TypeScript**, JavaScript

iOS Frameworks & UI: **SwiftUI, UIKit, Combine, Core Data, Realm**, Core Animation, Core ML, Foundation; adaptive/responsive layouts for iPhone & iPad (Auto Layout, size classes, **SwiftUI** adaptive containers)

React Native & Cross-Platform (5+ yrs): **React Native, TypeScript**, Redux Toolkit/Context API, Native Module bridge development (**Swift/Kotlin**), Apache Cordova

Architecture: **MVVM, VIPER, Clean Architecture**, MVC, Coordinator Pattern, SOLID, Protocol-Oriented Programming, Dependency Injection (protocol-based & constructor injection), **SPM** Modular Architecture

Concurrency: **Swift Concurrency** (async/await, **Actors**, Structured Concurrency, **AsyncSequence**), **GCD**, OperationQueue, Thread Safety

BLE & IoT: **CoreBluetooth** (CBCentralManager/CBPeripheral, GATT services), **WiFi** device provisioning, OTA firmware updates, **WebSocket, MQTT**

Networking, Security & Accessibility: RESTful APIs, **GraphQL, WebSocket, MQTT**, URLSession, BackgroundTasks; **Keychain**, Biometric Auth, **OAuth 2.0/JWT**, Certificate Pinning, CryptoKit (**AES-256**); Accessibility (Dynamic Type, VoiceOver, Apple HIG)

Testing: **XCTest, XCUITest**, Quick/Nimble, **TDD**, Jest, **React Native Testing Library**, Detox — unit, integration, UI and E2E testing

CI/CD & Build Tools: **Fastlane, GitHub Actions, Jenkins**, Git (GitFlow), App Store Connect, TestFlight, **Swift** Package Manager, CocoaPods, **Tuist, xcodebuild, SwiftLint**, Google Play Console

Cloud & Observability: **Firebase** (Analytics, Crashlytics, Performance Monitoring, Remote Config — feature-flag rollout & A/B testing), AWS (basic), Instruments, Xcode

AI-Assisted Development & Collaboration Tools: **GitHub Copilot**, Claude, Cursor (refactoring, test generation, docs); Jira, Confluence, Postman, Figma

Leadership & Process: Agile/Scrum, technical leadership, mentoring, code reviews, cross-functional collaboration, distributed team communication (India–US)

SELECTED PROJECTS

SMA Energy App & SMA 360° App — Consumer + installer apps (iPhone & iPad), SMA Solar Technology AG

Stack: **Swift, SwiftUI, Combine, BLE, WiFi**, OTA Updates, **MVVM** | Contribution: iPhone/iPad adaptive UI, **BLE/WiFi** IoT integration, multi-device discovery, OTA firmware, **Jenkins/Fastlane CI/CD** — cut installer commissioning time ~40%

Enphase Enlighten — Cloud-connected IoT smart-energy platform, 50,000+ users (Encora / Enphase Energy)

Stack: **Swift, SwiftUI, React Native, TypeScript, BLE, MQTT, Clean Architecture, SPM, Tuist** | Contribution: Led 6-engineer team; architected **BLE** device manager, **SPM** modularisation, security, offline sync

PROFESSIONAL EXPERIENCE

Senior Software Engineer – iOS & IoT — SMA Solar Technology AG

Jul 2025 – Dec 2025

SMA Energy App (Consumer) | SMA 360° App (Installer) | iPhone & iPad | Bengaluru, India

- Built two production iOS apps with adaptive, responsive layouts across iPhone and iPad, integrating real-time **BLE/WiFi** IoT device communication — multi-device discovery (up to 5 inverters), **WiFi** provisioning via **BLE** characteristic writes, and OTA firmware updates — reducing installer commissioning time ~40%.
- Architected concurrent multi-device **BLE** management using **Swift Concurrency (Actors, TaskGroup)** — Actor-isolated device state eliminated data races, verified via **Thread Sanitizer**; collaborated with firmware teams on GATT specs and managed App Store releases via **Jenkins/Fastlane CI/CD** with **SwiftLint**-enforced code standards.

Lead iOS Consultant – IoT & Mobile Architecture — Encora Innovation Lab Pvt. Ltd. (Client: Enphase Energy) Aug 2022 – Jun 2025

Enphase Enlighten — Cloud-connected IoT energy platform for 50,000+ users | Bengaluru, India

- Led a 6-member engineering team building Enphase's connected smart energy platform — **BLE/WiFi** multi-device management, real-time IoT telemetry via **WebSocket/MQTT**, OTA firmware delivery, and offline-first **Core Data** sync — for 50,000+ users.
- Architected an Actor-isolated **BLE** device manager with an **AsyncSequence**-based telemetry pipeline transforming raw peripheral callbacks into typed, reactive **SwiftUI** state — zero data races verified via **Thread Sanitizer**; resolved $O(n^2)$ chart-rendering bottlenecks, sustaining 60fps on high-frequency IoT data.
- Decomposed a monolithic codebase into 6 **SPM** feature modules with protocol-based API contracts, using **Tuist** and **xcodebuild** to manage modular build configuration, enabling parallel team delivery; enforced **MVVM/Clean Architecture** with CI-gated **TDD (XCTest, XCUITest)** and **SwiftLint** via **Jenkins** pipelines; built **React Native (TypeScript)** components alongside native iOS, exposing **BLE**/biometric capabilities via custom Native Modules for cross-platform parity.
- Implemented production-grade security — **Keychain**, biometric auth, **OAuth2/JWT**, certificate pinning, **AES-256** encryption; improved app performance 20%, reduced connectivity incidents 30%, and increased user engagement 25%; mentored 6 engineers through code reviews and architecture coaching.

Software Engineer – iOS & React Native — Legato Health Technologies

Aug 2020 – Jul 2022

Sydney Health — Consumer health & financial benefits app, 10,000+ users | Bengaluru, India

- Built Sydney Health (**React Native + SwiftUI/MVVM**) — insurance benefit management, claims, and identity verification for 10,000+ patients, with full biometric/**Keychain/OAuth2** security; delivered cross-platform iOS + Android features from a shared **TypeScript** codebase, driving a 15% engagement increase through data-driven UX improvements.

Senior Software Engineer – iOS — UST (Client: Legato Health Technologies)

Jan 2020 – Aug 2020

Bengaluru, India

- Delivered 3 production iOS features using **MVVM** and **TDD** — 100% on time, 2 weeks ahead of schedule — collaborating cross-functionally under Agile constraints.

iOS Developer – Synoverge Technologies / AIS Technolabs — Early Career

Aug 2014 – Nov 2019

VFS Global, Roquette App (Synoverge) | Core ML/Unity apps (AIS Technolabs) | Ahmedabad, India

- Shipped 10+ cross-platform apps (iOS + Android via Cordova) and 13+ native iOS apps using **Swift**, Objective-C, JavaScript, **Realm**, and Core ML; 3 apps live on the App Store with 30% faster load times through performance optimisation — building the engineering foundations behind 11+ years of continued growth.

EDUCATION, CERTIFICATIONS & RECOGNITION

Master of Computer Applications (M.C.A.) — Hemchandracharya North Gujarat University | Aug 2011 – May 2014

Certification: Professional Scrum Master (PSM I)

Recognition: Encora Inc – Extraordinary Client Service (2025), Living Our Values (2023); Legato Health Technologies – GoAbove Impact Award (2022), Team Player (2022), Individual Contributor (2021).
